PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience at Goldman Sachs building, modernizing, and supporting full-stack applications (Java/Spring Boot, Scala, TypeScript, React, Angular) for a global platform serving 6,000+ users. Skilled in Python, SQL, and AI/LLM applications, with a machine learning research background (IEEE Aerospace Conference 2025). Summa cum laude CS graduate.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, Scala, C++, SQL

Frameworks & Libraries: Spring Boot, React, Angular, Node.js, Next.js, FastAPI, GraphQL, REST APIs

AI / ML: LLM Applications, Multi-Agent Systems, Prompt Engineering, AI-Assisted Development, Machine Learning, Signal Processing

Data, Testing & Tools: MongoDB, JUnit, Jest, Automated Testing, Git, Legacy System Modernization, On-Call Incident Response

WORK EXPERIENCE

Software Engineer | Goldman Sachs | Dallas, TX Jul 2024 - Present

- Led end-to-end delivery of a high-impact client initiative for a global platform serving 6,000+ users across multiple markets, aligning Product, Legal, and C-suite stakeholders to ship scalable full-stack features on time.
- Spearheaded modernization of a 20+ year-old legacy system by mapping complex data architectures and coordinating global teams, reducing technical debt and improving maintainability and scalability.
- Engineered an AI-assisted trade reconciliation tool in Python that exposed systemic breaks in legacy reporting, identified the root cause of underreporting, and closed a compliance gap; used SQL to analyze complex datasets and clarify requirements.
- Delivered full-stack solutions in Java/Spring Boot, Scala, and TypeScript/React/Angular using AI-assisted development; sustained production stability through automated testing and on-call incident response during high-stakes trading hours.
- Managed Americas compliance for an enterprise-wide technology risk program; served as Co-Chair of the New Intern & Analyst Committee, organizing firm-wide mentorship and early-career programming.

AI/ML Research Assistant | Stevens Institute of Technology | Hoboken, NJ Sept 2023 - Apr 2024

Python | Machine Learning | Signal Processing | Data Analysis

- Co-authored a peer-reviewed paper accepted to the **IEEE Aerospace Conference 2025**, contributing to experimental analysis, results interpretation, and technical writing.
- Boosted model accuracy to 95% by analyzing data characteristics, refining preprocessing, and assisting with iterative model tuning for dynamic antenna switching.

Software Engineer Intern | Goldman Sachs | New York City, NY Jun 2023 - Aug 2023

- Developed Java and TypeScript features for a metrics dashboard, improving performance visibility and system monitoring.
- Enhanced dashboard usability with intuitive updates, streamlining workflows for internal users.

Software Engineer Intern | MEMX | Jersey City, NJ Jan 2022 - May 2022

- Engineered a high-throughput Top of Book Quote system in Java for a startup, increasing processing capacity from 200K to 1M quotes/sec and improving real-time data accuracy.
- Validated system reliability by designing and executing JUnit tests for critical quote logic.

PROJECTS

Aida – AI Studio for Cross-Stitch & Beginner Clay | Next.js, FastAPI, LangGraph, Python, TypeScript Aug 2025

- Architected a full-stack, multi-agent AI application with a LangGraph supervisor agent that routes requests to specialist agents for pattern conversion, skill coaching, recommendations, and clay lessons.
- Built a deterministic photo-to-DMC pattern pipeline using Lab color-space clustering and CIEDE2000 color-difference matching to assign accurate floss codes and avoid model hallucination; added human-in-the-loop palette approval and SSE streaming to the UI.

EDUCATION

Stevens Institute of Technology | B.S. in Computer Science May 2024

GPA: 3.9 | Summa Cum Laude | Dean's List | VP, Society of Women in CS | Student Representative, CS Department
